

DANIEL GONZÁLEZ

Frontend Engineer

Cabudare, Venezuela · +58 0424 520 0824 · danielgzp01@gmail.com · danielgzpdev.vercel.app

Software Developer with over 3 years of experience, primarily focused on the React and Next.js ecosystem. I am highly product-oriented; my goal goes beyond writing clean code to deeply understanding the business, allowing me to build scalable architectures that solve real-world problems. While my core strengths lie in Frontend development and system design, I have the versatility to navigate the full stack, manage deployments, and integrate AI to accelerate development and optimize workflows. I am passionate about taking projects from their initial concept all the way to production.

WORK EXPERIENCE

Essertech LLC

Lead Frontend Developer

Cabudare, Venezuela

May 2025 – Present

- **Product Development & Critical Modules:** Led the end-to-end development of complex modules for an ISP ERP system, encompassing FTTH network management, billing, inventory, purchasing, customer relations, and a ticketing system. Successfully unified all ISP operations into a single platform, translating daily business pain points into functional software solutions.
- **System Design & Pixel-Perfect UI:** Created the company's core System Design, developing a reusable component library and layouts adhering to Pixel-Perfect standards. Analyzed, designed, and built views from scratch, ensuring a cohesive, modern UI aligned with client needs.
- **Technical Leadership & Code Standards:** Defined the tech stack and established a modular architecture. Championed best practices and quality standards (Clean Code, design patterns), transforming the legacy codebase into a robust, maintainable, and secure technical foundation with advanced authentication flows and RBAC.
- **AI-Driven Process Optimization:** Accelerated the development cycle by 45% through the strategic integration of AI assistants. This implementation enabled agile problem-solving and record-time delivery of technical solutions to the client.
- **Tech Stack:** React.js, Next.js, Node.js, TypeScript, JavaScript, Tailwind CSS, Shadcn/ui, Zustand, Recharts, SWR, Docker, Husky, Figma, Cursor, i18n, Keycloak, NextAuth.

Essertech LLC

Junior Frontend Developer

Cabudare, Venezuela

August 2023 – May 2025

- **Real-Time Financial System:** Developed a custom web platform for a currency exchange, replacing manual Excel-based processes. Implemented the core logic for real-time rate calculations and transactions, ensuring scalability and absolute data accuracy.
- **SaaS Ecosystem Optimization:** Significantly improved the performance and UI/UX of an existing SaaS platform. Executed a full migration to a modern authentication architecture, ensuring secure scalability for massive user growth.
- **Global Marketplace & Multi-Tenant Architecture:** Built an interconnected marketplace from scratch linked to the core SaaS. Implemented a country-based multi-tenant architecture and a robust automated internationalization system to serve a diverse global market.
- **Tech Stack:** React.js, Next.js, Node.js, JavaScript, Tailwind CSS, Hero UI, Zustand, SWR, Figma, Clerk.js, Supabase, i18n.

- Improved system usability, redesigned the interface, and internationalized a spa appointment booking platform for commercial release.
- Developed a professional landing page to showcase the spa booking system to potential clients.
- **Tech Stack:** PHP, jQuery, PostgreSQL, HTML5, CSS, Bootstrap, Materialize.

EDUCATION

Instituto Universitario Jesús Obrero – Extensión Barquisimeto
Associate Degree in Computer Science

Barquisimeto, Venezuela
December 2019 - January 2023

SKILLS

- **Core & Frontend:** Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3.
- **Styling & UI:** Tailwind CSS, Bootstrap, Responsive Design, UX/UI, Shadcn/ui, Hero UI, Figma.
- **State Management & Data Fetching:** Zustand, Redux, SWR, Axios.
- **Backend & Databases:** Node.js, NestJS, Python, PostgreSQL, REST APIs.
- **Tools, Testing & DevOps:** Git, GitHub, Husky, Linux, Docker, Jest, Playwright, ESLint, Prettier, i18n, pnpm, npm.
- **AI & Development Environments:** Cursor, GitHub Copilot, Claude Code, n8n.
- **Project Management:** Linear, Plane, Trello, Agile Methodologies.
